## Solar Installation

There has been plenty of activity at our transmission site with the installation of Solar Panels thanks to the team from Solar Wholesalers in February.

The grant money received for this project has been used wisely and the Lofty 88.9 transmitter is now being powered by the Sun.

The inverter and battery installation was also completed. If you know a business, please suggest to them to come on board as a sponsor of Lofty. **(Scroll down pages 2, 3, 4)**

Some photos at the transmission site with some Lofty 88.9 volunteers.

**Several visitors have checked out the transmission site over the past couple of weeks during this exciting building process including independent Federal Member for Mayo Rebekha Sharkie.**

For the financial year to date we have received \$31,515 in grant money for the solar panels project at our transmission site at Cleggett Hill. In the previous financial year (2021/22) we received a CBF grant for the total of \$32,000 and a community hub grant from Rebekha Sharkie - Federal Member for Mayo for \$3,500 and a CBF grant for \$5,500, totalling \$41,000 incl GST.

The grants from the previous financial year assisted us in replacing equipment.

Check out the 'Transmission Site news' four minute video which is on the Lofty Radio Facebook Page. Here is a screen shot of Geoff pointing out the details of the antenna upgrade project.
